

The main title "First AED" in a large font, with "First" in grey and "AED" in red, accompanied by a red heart icon above the "i". Below it is the tagline "A life-saving system" in a bold, black, sans-serif font.

First AED

A life-saving system

The text "Results From The Langeland Project" is displayed in a bold, dark blue, sans-serif font, positioned on the right side of the image.

Results From
The Langeland Project

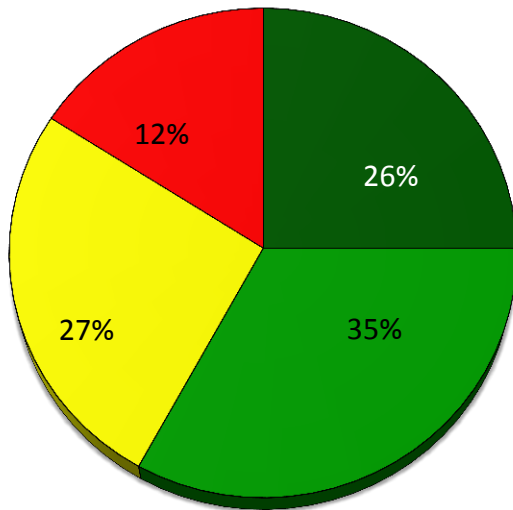

Langeland Project - Facts

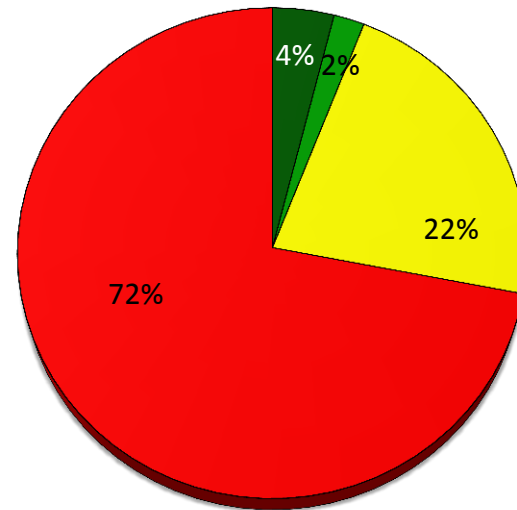

- The system has been in use since 26.3.2012
- First responders called out over 500 times.
- Median response time reduced by 50% to ca. 4 minutes.

First person on site (FPOS) FirstAED versus Ambulance

FirstAED

Ambulance (est.calculation)

First person on site (FPOS)

under 3 minutes

3-5 minutes

5-8 minutes

Over 8 minutes

Cardiac arrest – response time vs. estimated survival condition

Time (min)	1.	2.	3.	4.	5.	6.	7.	8.	9.	10.	10.+
Time (sec.)	0-60	61-120	121-180	181-240	241-300	301-360	361-420	421-480	481-540	541-600	600+
Survival (%)	90	81	73	66	59	53	48	43	39	35	
Consequence	Good chance of survival / Risk of disabilities low			Relative chance of survival / Risk of some disabilities		Limited chance of survival / definite disabilities			Very little or no chance of survival / severe disabilities		
FirstAED distrib. (%)	Approx. 26 %			Approx. 35%		Approx. 27%			Approx. 12%		
Estimated ambulance distrib. (%)	Approx. 4 %			Approx. 2 %		Approx. 22 %			Approx. 72 %
